Deployment Steps for Shiny Apps

1. Logon to Shinyapps.io and create your account

   https://www.shinyapps.io/

2. At the prompt, after registration, enter your "account name". Name cannot be less than 5 characters. Say, the name is 'demoacc'
3. Install package 'rsconnect' in RStudio. The rsconnect package can be installed directly from CRAN. To make sure you have the latest version run following code in your R console:

```
install.packages("rsconnect")
```

4. From your account in shinyapp, copy the token:

```
rsconnect::setAccountInfo(name='demoacc'
,token='2B5FCFFCFE7051AAC317F98B2AB88C10
', secret='<SECRET>')
```

5. Paste it into the console of Rstudio. Once you've entered the command successfully in R, that computer is now authorized to deploy applications to your shinyapps.io account.
6. To deploy your app, type in the console:

```
library(rsconnect)
rsconnect::deployApp('path/to/your/app')
```

   The deployed app can be accessed at: "demoacc.shinyapp.io/<appname>"
